Skills

Languages: C/C++, Java, Python, JavaScript, HTML, CSS, PHP
SAP Technologies: SAP UI5, SAP Fiori, CAP (Java), SAP BTP (Cloud Foundry)
Databases : MySQL, PostgreSQL, SAP Hana DB, MongoDB

Work Experience

SAP Labs India, Bangalore <i>Associate Application Engineer</i> - Worked on SAP ERP Public Cloud Tools and delivery – In Product Communication (IPC). - Developed and shipped multiple full-stack features (frontend and backend) for an enterprise communication platform, including automated API testing, production database migrations, and code refactoring to improve reliability. - Contributed to the integration with SAP SuccessFactors to extend the cross-product reach. - Built a prototype application using AI-powered tools (Cline, Claude, MCP Servers) and delivered knowledge-sharing session on integrating AI developer tools into active development workflows for the broader team. - Learning and working on AI agent development, agent-to-agent protocols, agent deployment on SAP BTP with Kyma, and integration with Joule UI.	Aug 2025 - Present
SAP Labs India, Bangalore <i>SDE – Grad intern (6 month – onsite internship on the last semester of Engineering)</i> - Engineered and deployed 3 production-grade internal applications for SAP LoB operations using CAP Java, SAP HANA, SAP UI5, and SAP Fiori. - Developed workflow-driven applications for employee recognition, team outing management, and birthday event planning with role-based access and approval flows . - Implemented business features including nomination validation, automated certificate generation using Python Pillow, participation management, transport preference handling, and dynamic event filtering. - Delivered applications adopted by 75+ employees and used operationally during the organization’s Annual Day events and employee engagement initiatives.	Jan 2025 - Jul 2025
SAP Labs India, Bangalore <i>Summer Intern (2 month - onsite internship in the pre-final year of Engineering)</i> - Worked on SAP Ariba Procurement – Contract Price renegotiation (CPR) for product sourcing. - Performed automation testing for a live CPR project using Qmate , a custom Webdriver-IO based testing framework. - Gained hands-on experience with SAP Business Technology Platform (BTP). - Developed the frontend of a survey application using SAP Fiori and UI5.	Jun 2024 - Aug 2024
College Of Engineering Guindy, Anna University, Chennai B.Tech. in Information Technology Relevant Coursework: Object Oriented Programming, Databases, Discrete Maths, Advanced Data Structures and Algorithms, Design and Analysis of Algorithms, Operating Systems, Computer Networks, Computer Architecture, Machine Learning, Artificial Intelligence, Graph Theory, Compiler Engineering, Cryptography, Information Retrieval.	Aug 2021 - Jun 2025 CGPA:8.52/10
Alpha Wisdom Vidyashram – CBSE , Tiruchirappalli Higher Secondary Certificate - 12th Secondary School Certificate - 10th	Aug 2019 - Jun 2021 97.8% 97.0%

Project Work

- [Design Genie](#) : developed an AI-powered creative assistant that generates personalized event posters effortlessly with enhanced prompts, dynamic scenes, and catchy slogans using Stable Diffusion and NLP.
- [Oral Cancer Risk Analysis](#): Developed an oral cancer risk analysis system using Convolutional Neural Networks (CNNs) for lesion image analysis and Random Forest algorithms for evaluating clinical data, integrating both methods to provide a comprehensive risk assessment.
- [Culinary canvas](#) : Developed the Culinary Canvas restaurant website using Java JSP Servlets to enable online ordering. Implemented features for users to add items to their cart, process online payments, enter delivery addresses, and arrange order deliveries.
- [Insights-Course Instruction website](#) : Developed a user-friendly website to teach traditional sciences and Vedic Maths to middle school students using the MERN stack Under the guidance of Dr. Bama Srinivasan from the Department of IST for 2 academic credits.
- **IOT Based Smart Kitchen System** : A Smart Kitchen System using MQ-2 Gas Sensor for early gas leak detection and an HX711 Load Cell for real-time LPG weight monitoring. This system improves kitchen safety by detecting gas leaks instantly and helps users track LPG consumption effortlessly. Combining IoT, sensor tech, and real-time monitoring for safer, smarter homes

Certificates

- **SAP Certifications:**
 - [SAP Certified Generative AI Developer](#)
 - [SAP Certified Cloud Native Developer Java](#)
- [AI Agents Fundamentals](#) - Hugging Face
- [McKinsey Forward Program](#)
- [Model Context Protocol : Advanced Topics](#) – Anthropic Academy
- [SQL Intermediate](#) – HackerRank
- Introduction to Artificial intelligence and Data Science – Durham University

Awards

- [Spotlight Award](#) – as part of Annual awards 2025 of the SAP S/4 HANA ERP public cloud tools and delivery, Bangalore
- Elected scrum champion thrice within a 10 member development team
- Runner up – Tech Diva, ITRIX'24 (Women-only Coding Competition), ISTA-CEG, Anna University
- Runner up – Break the Query (SQL Event), ISTA-CEG, Anna University
- Winner – Code for Queens (Women-only Coding Competition), Sync'23 Symposium, CSEA-CEG, Anna University

Organizations and Volunteering

- Active member of [SAP BWN India](#) Bangalore – volunteering for India vision series, Women's day celebration.
- Ex -Treasurer of ACM (Association of Computing Machinery) chapter of CEG, Anna University
